

Plugging the Z value just calculated into the Z table (Table 11.1), we can find the probability.

PERT can also predict the date by which a certain event will be completed with a certain level of confidence (i.e., probability). This date is calculated by using the set probability value (level of confidence) to find the corresponding Z value in the Z table.

Table 11.1 Z Table: Cumulative Probability of the Standard Normal Distribution

Z	0.00	0.01	0.02	0.03	0.04	0.05	0.06	0.07	0.08	0.09
0.0	0.5000	0.5040	0.5080	0.5120	0.5160	0.5199	0.5239	0.5279	0.5319	0.5359
